TEELUTU BUG

For sales information: sales@theauto.net

The AutoNet, has developed a program that receives purchase requests from all automotive internet lead sources and places them into one lead management system.

Experienced automotive people who understand all aspects of dealership operations manage our company. With this in mind, our people are responsive to the needs of dealership management. Supplying timely information is critical in today's automotive business and our programs are designed to accomplish this and more.

The continued development of Internet programs will provide all dealers with choices. Our primary objective is to introduce the newest and best-developed programs available on the market today.

A business model like our new "Lead Management Program" greatly improves the sales lead follow-up, to insure greater sales penetration and improved CSI ranking. This program can be experienced through a demonstration at your dealership. It is important to understand that all program installations include full training of the material with hands on applications, sales training, and technical support.

We are continuing to develop additional management programs that will benefit the automotive dealer's organization and the industry as a whole. We know that this particular "Lead Management Program" is in need, and has been widely accepted by dealers throughout the country. We are extremely excited about the future of our company and with the products we have to offer the automobile dealership.

Sincerely,

Bill Vowles

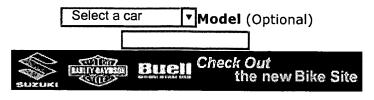

President

Simply select a make from the pulldown menu (and model if you like) and click on quick search, or click on advanced search for a more detailed search.
